

ICAR-CICR, Nagpur organised an awareness campaign on Efficient and balanced use of fertilizers and region-specific agroforestry on 21st June 2022

ICAR-Central Institute for Cotton Research (ICAR-CICR), Nagpur in collaboration with CITI-CRDA has organised an awareness campaign on efficient and balanced use of fertilizers and region-specific agroforestry on 21st June 2022 in village Kondhali, District Nagpur in Maharashtra state. The training was provided to the farmers on importance of soil testing in nutrient management, how to draw soil samples for testing, and importance of agro-forestry in enhancing the farm income and profitability. Mr. Keshav Dhurve, Sarpanch of the village presided over the function. Dr. D. Blaise, Head, Division of Crop Production delivered a lecture on balanced use of fertilizers during various growth stages of cotton crop for enhancing the nutrient use efficiency and crop productivity. Dr. Manikandan, Scientist (Soil Science) guided the farmers about drawing soil samples in the field. Dr. Sachin Wankhede delivered a talk on the importance of sustainable agriculture and balance of ecosystem in agroforestry.

About 50 farmers from the Kondhali and nearby villages participated in the programme.
